

Self-Adhesive Lined Butyl Tape
JOIST + LEDGER DECK TAPE

PRODUCT DESCRIPTION

CAMO Deck Tape is a self-adhering protective membrane engineered to protect decks from premature rot and corrosion. It features a high-performance butyl hybrid adhesive with a high-strength non-slip polypropylene backing. CAMO Deck Tape will self-seal around nails and fasteners to prevent water infiltration, wood rot and lumber breakdown. Product comes individually wrapped in labeled rolls.

ABOUT CAMO

For more than 60 years, CAMO has been helping contractors, builders, and weekend warriors build better. CAMO exists to provide the best deck fastening installation experience for hardworking doers who take pride in their work and value their wallet. CAMO products are engineered to save you time and ensure your work looks and performs as you expect it should.

INSTALLATION INSTRUCTIONS

Surfaces should be clean and dry.

Best when applied in temperatures above 20 degrees F.

1. Peel back the release paper.

2. Apply to the intended surface and press into place.

Continue to peel and apply the length of the surface.

3. Cut tape to the desired length.
